Re: AFIR for NPDES Phase II MS4 General Stormwater Permit
IL40 0502 DuPage County Stormwater Management & Co-Permittees
March 1, 2024 – February 28, 2025

Enclosed is the County of DuPage's Annual Facility Inspect Report (AFIR) for the National Pollutant Discharge Elimination System Phase II MS4 General Stormwater Permit ILR40 for 2024-2025. This report includes activities that were undertaken and achieved for all of DuPage County. Thirty-two municipalities and nine township highway districts have chosen to participate as co-permittees in our permit program to meet the six control measures of Public Education and Outreach, Public Participation/Involvement, Illicit Discharge Detection and Elimination, Construction Site Runoff Control, Post-Construction Runoff Control, and Pollution Prevention/Good Housekeeping for Municipal Operations.

The following list of county, municipalities, and township highway districts (with previously issued permit numbers) are included as participating in the enclosed report of permit achievements for the 2024-2025 permit term:

MUNICIPALITY	ILR40 Permit #	Co-Permittee Bureau ID

Division of Water Pollution Control ANNUAL FACILITY INSPECTION REPORT

for NPDES Permit for Storm Water Discharges from Separate Storm Sewer Systems (MS4)

This fillable form may be completed online, a copy saved locally, printed and signed before it is submitted to the Compliance Assurance Section at the above address. Complete each section of this report.

Report Period: From March, 2024 To March, 2025

Permit No. ILR40 0502

MS4 OPERATOR INFORMATION: (As it appears on the current permit)

Name: DuPage County Stormwater Management Mailing Address 1: 421 N. County Farm Road
Mailing Address 2: _____ County: DuPage
City: Wheaton State: IL Zip: 60187 Telephone: 630.407.6673
Contact Person: Mary Beth Falsey Email Address: falsey@dupagecounty.gov
(Person responsible for Annual Report)

Name(s) of governmental entity(ies) in which MS4 is located: (As it appears on the current permit)

County of DuPage
41 municipalities and townships listed on cover letter

THE FOLLOWING ITEMS MUST BE ADDRESSED.

A. Changes to best management practices (check appropriate BMP change(s) and attach information regarding change(s) to BMP and measurable goals.)

- | | | | |
|--|--------------------------|---|--------------------------|
| 1. Public Education and Outreach | ☐ | 4. Construction Site Runoff Control | ☐ |
| 2. Public Participation/Involvement | ☐ | 5. Post-Construction Runoff Control | ☐ |
| 3. Illicit Discharge Detection & Elimination | ☐ | 6. Pollution Prevention/Good Housekeeping | ☐ |

B. Attach the status of compliance with permit conditions, an assessment of the appropriateness of your identified best management practices and progress towards achieving the statutory goal of reducing the discharge of pollutants to the MEP, and your identified measurable goals for each of the minimum control measures.

C. Attach results of information collected and analyzed, including monitoring data, if any during the reporting period.

D. Attach a summary of the storm water activities you plan to undertake during the next reporting cycle (including an implementation schedule.)

E. Attach notice that you are relying on another government entity to satisfy some of your permit obligations (if applicable).

F. Attach a list of construction projects that your entity has paid for during the reporting period.

Any person who knowingly makes a false, fictitious, or fraudulent material statement, orally or in writing, to the Illinois EPA commits a Class 4 felony. A second or subsequent offense after conviction is a Class 3 felony. (415 ILCS 5/44(h))

POST OFFICE BOX 19276
SPRINGFIELD, ILLINOIS 62794-9276

SECTION A

No changes were made to Best Management Practices during the reporting year.

SECTION B**A. Public Education and Outreach****A1. Distribution of Paper Material**

DuPage County Stormwater Management (DCSM) has created several handouts and brochures pertaining to sources of pollutants in waterways and water quality BMPs. These, as well as handouts from other entities, are distributed at public events, are available in office, posted online, and sent out in newsletters and through social media. Informational topics include rain barrels, rain gardens, native plants, other green infrastructure techniques, citizen monitoring of waterways and seasonal BMPs for the spring, summer, fall and winter. These materials are updated as needed to incorporate new and updated information, including the effects of climate change on stormwater impacts. Each co-permittee is responsible for making educational materials available in their office and on their websites.

Goal:

Number of educational materials updated or created per year for distribution.

Milestone:

Update or create 2 digital or print materials for distribution by co-permittees.

Status:

During the reporting year, DCSM staff and contracted staff from The Conservation Foundation created or updated the following educational materials:

- Social Media infographics which can be found on our Facebook and Instagram pages and shared by co-permittees. They can be found at <https://www.facebook.com/DuPageSWM> , and <https://www.instagram.com/dupageswm/>
- DuPage County's 2024 Annual Report (Annual Report on the Stormwater Management Department including flood control, shared services, permitting, and water quality): <https://www.dupagecounty.gov/swm/>

DCSM and co-permittees share these and other educational materials through distribution at events, in offices, on websites, through social media, and newsletters. In addition to the above material, brochures, publications, and educational materials can be found at:

https://www.dupagecounty.gov/government/departments/stormwater_management/water_quality/outreach_materials.php

Digital versions of brochures were available on websites in pdf form and shared through email, newsletter, and social media links.

A2. Speaking Engagement

DCSM coordinates, hosts, and presents at workshops on topics including water quality efforts for the watersheds, methods for pollutant reduction, during and after construction BMPs, native vegetation, and green infrastructure. Presentations include information on the potential impacts and effects of stormwater discharge due to climate change as applicable. Each co-permittee is responsible for promoting and advertising workshops within their jurisdictions.

Goal:

Number of presentations made by DCSM staff per year.

Milestone:

Conduct 7 presentations per year.

Status:

Presentations are made by co-permittees at in person and virtual meetings, conferences, tours, and other events throughout the reporting year. Staff presented and hosted virtual educational workshops and conferences to educate the general public as well as professionals about water quality trends and issues. Virtual workshops and conferences are made available to residents and professional staff as applicable. Virtual events have proven to be more convenient for attendees, resulting in an increase in attendance. Both formats are expected to continue into the future. The following presentations were made by DCSM and co-permittee's staff during the reporting year:

Agency	Outreach	Date	Location	# of Attendees	General Category	Involvement

A3. Public Service Announcement

DCSM utilizes technology to enhance outreach efforts detailing water quality trends and highlighting practices that can reduce the transport of pollutants into waterways. DCSM promotes informational outlets using a Stormwater Management monthly e-newsletter, direct media relations, press releases, advisories, and social media to promote seasonal BMPs, events, and other stormwater-related news.

Goal:

Number of messages broadcast within the co-permittee area per year (Co-permittee area includes the limits of all participating MS4s).

Milestone:

Broadcast 12 messages within the co-permittee area detailing water quality trends highlighting practices that can reduce the transport of pollutants into waterways.

Status:

During the reporting year, DCSM staff disbursed information throughout the countywide co-permittee area on water quality trends, largely through virtual formats such as social media and email.

- Monthly Newsletter with over 15,200 subscribers, archive of newsletters stored below:
https://www.dupagecounty.gov/government/departments/stormwater_management/departments_news.php
- Facebook & Instagram with over 1,500 followers and over 50,000 views
<https://www.facebook.com/DuPageSWM>
<https://www.instagram.com/dupageswm/>
- YouTube with more than 80 outreach/training videos and over 90,000 combined views
<https://www.youtube.com/@DuPageSWM/videos>
- New Account on Nextdoor, which allows public agencies to share info directly with every account in their jurisdiction. DCSM has 262,000 members in their audience, with posts averaging 20,000 views

In addition to sharing and promoting the DCSM information listed above, co-permittees also distributed information through the following public service announcements & social media posts:

A4. Community Event

DCSM coordinates with co-permittees to present at countywide community events, both in person or virtually, on topics including water quality efforts for the watersheds and pollutant reduction, native vegetation, and green infrastructure.

Goal:

Number of events participated in or hosted per year.

Milestone:

Host or participate in 9 countywide events per year to educate the public on water quality topics.

Status:

In a typical year, DCSM and co-permittee staff attend, present at, sponsor, and host events throughout the county to educate the public about water quality topics and issues. A combination of in-person and virtual events took place during the reporting year and are expected to continue into the future. Events are advertised by DCSM and co-permittees through newsletters and social media. During the reporting year, the following events were hosted, attended, and/or presented at:

Events hosted / participated in:

Agency	Event	Date	Location(s)	# of Attendees / Items Collected	Involvement
Addison	Addison Recycling Event	4/13/2024	1491 Jeffrey Dr, Addison, IL 60101	454	Sponsor and Host

A5. Classroom Educational Material

Goal:

DCSM partners with schools and local educational organizations throughout the co-permittee area on stormwater management and water quality education promoting water quality and environmental efforts using watershed models and other educational tools.

Milestone:

Target at least 10 schools within the permit area with outreach programs per year.

Status:

DuPage County promoted student and teacher education of water quality topics by supporting S.C.A.R.C.E. (School and Community Assistance for Recycling and Composting Education). The following activities were conducted by S.C.A.R.C.E. and supported by DuPage County during the reporting year:

Education Categories: RB-Rain Barrel, NP-Native Plants, PP-Permeable Pavers, GB- Green Building, SWM- Stormwater Management, BMP-Best Management Practices, HHW-Household Hazardous Waste, Q&Q- Quantity and Quality, GR- Green Roof, BS- Bio Swale, RX- Medicine Disposal, COC - Curbside Compost, COO- Backyard Compost, COW- Indoor Compost, COR - Cooking Oil Recycling, Phos- Phosphates, WS- Watershed Model, GWFM-Groundwater Flow Model, CW- Car Washing, SDC- Sustainable Design Challenge, GC- Green

B. Public Participation/ Involvement

B2. Educational Volunteer

Goal:

DCSM sponsors a variety of volunteer opportunities, including: the Adopt-a-Stream program, the DuPage River Sweep, and the storm drain medallion program.

Milestone:

Participate at or sponsor 3 events targeted at school aged children per year.

Status:

DuPage County sponsors the following programs through the Conservation Foundation and SCARCE on behalf of all co-permittee communities:

Winter Chloride Watchers

The Winter Chloride Watchers Program is an extensive citizen science initiative that utilizes volunteers to track chloride amounts in streams before, during and after the winter months. Starting in 2023, TCF brought this volunteer program to northeastern Illinois to help gain a clearer picture of how chlorides affect aquatic life and community members learn how Salt Smart winter practices can reduce the amount of chlorides that reach waterways. Volunteers are trained to learn the basics of chloride monitoring and are given materials to take part in water testing at a local river or stream. DCSWM sponsored kits for DuPage residents to participate in this program. Volunteers are responsible for testing their designated stream section once a month, then share their results to a database hosted by the Water Rangers, a Canadian-nonprofit organization. The link to the database can be found here: <https://app.waterrangers.ca/groups/winter-chloride-watchers>

In total, 66 sites across the County were regularly monitored by 47 volunteers, reporting 420 samples by the end of the reporting year.

One Chloride Watchers training was held during the reporting year:

Date: October 22, 2024 | 6:30-8pm | Lombard Village Hall, in-person

Attendance: 24 registrants, 16 attendees

Speaker: Hanna Miller, The Conservation Foundation

Abstract: Understanding how chlorides impact our local streams starts with measuring their presence in the water—and that's where you come in! As a volunteer Winter Chloride Watcher, you'll learn the basics of chloride monitoring and take part in water testing at a local river or stream. With this data, we will gain a clearer picture of how chlorides affect aquatic life and how Salt Smart winter practices can reduce the amount of chlorides that reach waterways.

Storm Drain Medallions

DuPage County sponsors Storm Drain Medallion programs through The Conservation Foundation and SCARCE. Storm drain medallions are applied by volunteers to educate the public on non-point source pollution from stormwater runoff. Volunteers receive the medallions, adhesive, alcohol wipes (to remove glue from their hands) and a wire brush. An education video and information materials are provided to the participants to instruct them on the proper placement of the medallions.

Medallions applied through the SCARCE program:

- Addison – 2
- Aurora – 5
- Elmhurst – 2
- Itasca – 12
- Naperville – 12
- Warrenville – 1
- Willowbrook – 1

2024 DuPage County River Sweep

The annual DuPage River Sweep is a county-wide, self-coordinated stream cleanup and restoration event. The purpose of the River Sweep is to encourage volunteers to help "sweep our rivers clean" by picking up debris in and along the local waterways and restoring nearby land back to its natural state. Since its inception in 1991, over 16,029 volunteers have removed approximately 308 tons of garbage from the DuPage River and Salt Creek waterways.

Date of Event: May 4, 2024

Number of Participants: 458 volunteers

Area Covered: Approx. 38 miles

Sites and Tons of Litter: Approx. 4.9 tons

2024-2025 ANNUAL FACILITY INSPECTION REPORT

			tons	4.9

Restoration work conducted as part of the DuPage River Sweep in 2024:

Type of Restoration Work: Teams removed garlic mustard.

Restoration	Bags
Bolingbrook	14
Lisle (Hitchcock Woods)	4
Naperville – DuPage sites (estimate)	4
Bags of invasive species collected (est)	22

Adopt-A-Stream

Adopt-A-Stream was initiated by DCSM in 1995. The program encourages citizen-based stewardship of the County's water resources to keep them healthy, clean, and attractive. It supports the belief that everyone can make a difference in the aquatic habitats and general appeal of the County's waterways.

- Number of Volunteer Groups: 18
- Number of Volunteers: 347
- Number of bags of trash: 269
- Estimated pounds of trash: 2,930 lbs

Conservation@Home / Conservation@Work

The Conservation@Home and Conservation@Work programs promote the use of native landscaping, rain gardens and rain barrels to homeowners, businesses, and developers in DuPage County.

Conservation@Home/Work provides a way to educate the citizens of DuPage County about stormwater and provides them with the resources they can use to improve water quality on their properties. DCSM sponsors the programs which are conducted by The Conservation Foundation. Staff conducts evaluations and certifications of residential properties, school campuses and business properties throughout the county as well as provides information and resources for planting and maintaining certified properties and promotes the program through presentations and partnerships.

In 2024, TCF staff held one-hundred forty-six (146) Conservation @ Home site visits, forty (40) certifications and seventeen (17) presentations in DuPage County alone. Of these, ninety-two (92) consultations, seventeen (17) certifications, and fourteen (14) presentations were supported by DCSWM. Additionally, six (6) Conservation@Work properties were certified at the Glen Ellyn Park District, Golf View Hills Park District, Faith Lutheran Church of Glen Ellyn, St Andrew Lutheran Church of West Chicago, The Terraces of Brookdale, and St Daniel the Prophet Catholic Church of Wheaton.

Educational programs supported by DCSM included topics such as habitat improvements, storm water containment, rain barrels, and native plantings attracted an estimated four hundred thirty-five (435) attendees:

Rain Barrels

During the reporting year, 377 rain barrels were distributed throughout DuPage County communities. Sales were through TCF's website link for DuPage County residents to purchase rain barrels and/or through rain barrel pick-up events TCF helped organize. Residents have the option to pick up their rain barrel at TCF's office or they can have it delivered. There is also a video instructing homeowners on how to install a rain barrel connection on our website. Videos instructing homeowners on how to install a rain barrel are posted on the DuPage County Love Blue Live Green YouTube page and TCF website.

TCF promoted rain barrels to residents at the following pick-up events, in addition to weekly pickup at TCF's headquarters at the McDonald Farm:

	Carol Stream	Downers Grove	DuPage County	Elmhurst	Itasca	Naperville	West Chicago	Wheaton	Conservation Foundation sales within DuPage County via Website		Rain barrels Sold
									Pick Up	Delivery	
Total	15	86	14	57	45	14	20	4	112	10	377

B3. Stakeholder Meeting**Goal:**

DCSM hosts regular water quality stakeholder meetings in the form of workshops in each of the main watersheds to address matters pertaining to pollutant reduction on a watershed level. These have largely moved to a virtual format and are now available to all members of the public throughout all watersheds. In addition, watershed stakeholder meetings are held to gather input on water quality impairments as part of watershed planning efforts.

Milestone:

Participate in or organize 3 water quality stakeholder meetings per year.

Status:

Stakeholder meetings are held on a virtual platform.

Watershed Planning Stakeholder Meetings	Date
Lacey Creek Watershed Plan Second Stakeholder Meeting	5/30/2024
Upper West Branch Watershed-Based Plan Stakeholder Meeting 1	9/12/2024
Lacey Creek Watershed Plan Public Meeting	9/18/2024

B4. Public Hearing**Goal:**

DCSM provides opportunity for public comment at countywide annual public meetings in order to reach all interested residents to provide input on the adequacy of its MS4 program, watershed plans, and projects. DCSM publicizes public meetings in conjunction with its education and outreach initiatives. Notice of public meetings is also distributed through co-permittee agencies.

Milestone:

Conduct one countywide public input meeting per year.

Status:

For the 2024-2025 reporting year, a countywide virtual public meeting space was created including an informational video and public comment portal. The virtual meeting space was open from February 5 through February 19, 2025. Information on the virtual meeting space and public comment portal was shared through a press release and posted on the County's website. The information was also shared through email with all co-permittees for additional distribution. During the comment period, a total of 10 comments were received. Comments were addressed through a public comment response document.

DuPage County Stormwater Management Accepting Input on Water Quality Program

Wheaton, IL – DuPage County Stormwater Management is currently accepting input on their Countywide Water Quality Program. Comments will be accepted through February 19, 2025.

The Countywide Water Quality Program includes a partnership of DuPage County and 41 municipalities and townships working together to meet water quality goals. Included within this partnership, the Illinois Environmental Protection Agency granted DuPage County Stormwater Management a countywide permit to meet federal water quality requirements, including:

- Public Education and Outreach on Water Quality Topics
- Public Involvement and Participation
- Illicit Discharge Detection and Elimination
- Construction Site Erosion and Sediment Controls
- Post-Construction Best Management Practices for Water Quality
- Pollution Prevention and Good Housekeeping for Municipal Operations
- Water Quality Monitoring Program

A public comment portal has been created where visitors can view an informational video on DuPage County's Water Quality Program, download the complete program plan and submit electronic comments. It can be found at

https://www.dupagecounty.gov/government/departments/stormwater_management/water_quality/water_quality_program.php.

DuPage County Stormwater Management is accepting input on the program through February 19, 2025. Comments may be submitted electronically by visiting the link above, by email to water.quality@dupagecounty.gov or by mail to:

DuPage County Stormwater Management
Attn: Mary Beth Falsey
421 North County Farm Road
Wheaton, IL 60187

For questions or issues, please contact DuPage County Stormwater Management at (630) 407-6673.

STORMWATER MANAGEMENT

February 5, 2025

DuPage County Stormwater Management is currently accepting input on their Countywide Water Quality Program. Comments will be accepted through February 19, 2025.

The Countywide Water Quality Program includes a partnership of DuPage County and 41 municipalities and townships working together to meet water quality goals. Included within this partnership, the Illinois Environmental Protection Agency granted DuPage County Stormwater Management a countywide permit to meet federal water quality requirements, including:

- Public Education and Outreach on Water Quality Topics
- Public Involvement and Participation
- Illicit Discharge Detection and Elimination
- Construction Site Erosion and Sediment Controls
- Post-Construction Best Management Practices for Water Quality
- Pollution Prevention and Good Housekeeping for Municipal Operations
- Water Quality Monitoring Program

A public comment portal has been created where visitors can view an informational video on DuPage County's Water Quality Program, download the complete program plan and submit electronic comments. It can be found at https://www.dupagecounty.gov/government/departments/stormwater_management/water_quality/water_quality_program.php.

DuPage County Stormwater Management is accepting input on the program through February 19, 2025. Comments may be submitted electronically by visiting the link above, by email to water.quality@dupagecounty.gov or by mail to:

DuPage County Stormwater Management
Attn: Mary Beth Falsey
421 North County Farm Road
Wheaton, IL 60187

For questions or issues, please contact DuPage County Stormwater Management at (630) 407-6673.

Additionally, the DuPage County Stormwater Management Planning Committee regularly holds monthly meetings on the first Tuesday of each month at 7:30 am. The DuPage County Stormwater Management Planning Committee is comprised of DuPage County Board Members and Municipal/ Community Members. At the beginning of each meeting, there is a public comment period which allows members of the public to provide input on the County's Stormwater program. The following Stormwater Management Planning Committee meetings were held during the reporting year:

- March 5, 2024
- April 2, 2024
- May 7, 2024
- June 4, 2024
- July 2, 2024
- August 6, 2024
- September 3, 2024
- October 1, 2024
- November 5, 202
- December 3, 2024
- January 7, 2025
- February 4, 2025

Official minutes and agendas for all meetings can be found at:

<https://dupage.legistar.com/Calendar.aspx>

B6. Program Involvement**Goal:**

DCSM coordinates educational and public involvement strategies. To gauge their effectiveness, DCSM develops and distributes surveys via an email list, webpage, and/ or on social media. These surveys gather feedback from recent outreach activities and measure citizen views, behaviors, and concerns pertaining to a variety of topics, including water quality, property management, flood perceptions, and residential pollutant control.

Milestone:

Develop and disperse 1 survey per year.

Status:

In 2024, DCSM reissued a survey created in 2014, to assess knowledge and behavior around water quality issues. The goal was to compare behavior changes within 10 years of the program, and to serve as a benchmark for future outreach initiatives. It also provides insight into the best communication channels to reach our audience.

While the survey was published during the 2023-2024 reporting year, the survey remained open into the 2024-2025 reporting year. The survey was advertised through Facebook, Instagram, Nextdoor, and through co-permittee communication channels.

We received a total of 164 responses to the survey. Valuable information was obtained and will be used to guide the program moving forward. Highlights and trends from the responses included:

- Less residents know what happens to water that enters storm sewers in 2024 when compared to 2014.
- Importance of county water quality has increased from 2014 to 2024.
- E-newsletters and mailers are still the most effective way to educate residents.
- There is less understanding (percent decrease ranging from ~4%-9%) on the topics of watersheds, BMPs, Green infrastructure, stormwater runoff, and nonpoint source pollution. The topic of native plants was the only topic to experience a higher understanding (~8% increase).
- Nonpoint source pollution is the topic that is least understood in the 2014 and 2024 surveys.
- Residents are slightly more likely to join a water stewardship group in 2024 when compared to 2014.
- There is a ~10% increase in 2024 of residents using private companies for lawn mowing and lawn fertilizing when compared to 2014.
- Residents are a lot less likely to bag their leaves in 2024 compared to 2014.
- Residents are more likely to install native plants in 2024 than in 2014.
- Slightly more knowledge and use for French drains and dry wells in 2024 than in 2014.
- Residents are less familiar with bioswales in 2024 than in 2014.

C. Illicit Discharge Detection and Elimination

C1. Storm Sewer Map Preparation

Goal:

Partner agencies provide a current storm sewer atlas to DCSM. DCSM will collect, compile, and field verify storm sewer maps from partner agency data to create a comprehensive storm sewer atlas of the partnership area (the municipal limits of all participating MS4s). The partner agencies will provide DCSM with annual updates of the storm sewer atlas.

Milestone:

Complete the storm sewer atlas for 95% of DuPage County.

Status:

DuPage County Stormwater staff continues to work with townships, municipalities, and other county departments to update the storm sewer atlas with current storm sewer locations. Currently, 91% of communities are mapped within the county's GIS. No updates were completed within the reporting year.

During the 2024 reporting year, DuPage County Stormwater continued to combine all storm sewer data for the county into one comprehensive GIS database. Combining each agency's data into one comprehensive layer will simplify tracing and spill response within DuPage County. Staff began creating a standard attribute set for the County in 2017 and continued to work with DuPage County Department of Transportation throughout 2024 on combining all data into a comprehensive layer.

C2. Regulatory Control Program

Goal:

Each co-permittee has enacted an Illicit Discharge Detection and Elimination (IDDE) Ordinance which regulates non-stormwater discharges to the Municipal Separate Storm Sewer System. DCSM enforces IDDE violations within unincorporated DuPage County and the Townships. Municipalities are responsible for enforcement within their limits. DCSM notifies the municipality when an illicit discharge is detected within municipal limits. DCSM informs the municipality of the location of the illicit discharge, the time(s) and date(s) of the discharge, and any additional information that would be necessary or prudent for the Municipality to have in order to carry out enforcement proceedings. DCSM provides municipalities with information required for enforcement action and prosecution and produces DCSM personnel in court, as necessary and upon adequate notice.

Milestone:

Review and amend the Ordinances, as needed to reflect new information and regulations.

Status:

No amendments were made during the 2024-2025 reporting period.

C3. Detection/Elimination Prioritization Plan

Goal:

DCSM compiles information pertaining to the ten-step prioritization plan identified in the DuPage County IDDE Program Technical Guidance. Major watersheds for which outfalls have been prioritized.

Milestone:

Review West Branch priority outfalls and revise as needed

Status:

West Branch priority outfalls reviewed and field verified.

Priority outfalls within each watershed:

Salt Creek: 92

East Branch DuPage River: 118

West Branch DuPage River: 99

Des Plaines and Fox River: 7

C4. Illicit Discharge Tracing Procedures**Goal:**

Follow guidelines in the IDDE Program Technical Guidance manual to trace illicit discharges. Update the manual to reflect new techniques and practices.

Milestone:

Continue tracing illicit discharges in accordance with the DuPage County IDDE Technical Guidance Manual. Review and update the manual as needed.

Status:

DuPage County Stormwater Management staff monitored West Branch DuPage River outfalls and all priority outfalls within the county. Staff also responded to complaints regarding illicit discharges. Any suspected illicit discharges were traced to their source when applicable and removal of the discharge was completed through use of the IDDE Technical Guidance Manual protocols.

Date	Municipality	Issue	Outcome
3/5/2024	Carol Stream	Oil sheen	Oil booms were placed to contain and protect downstream waterways. Stormwater Management assisted Carol Stream in tracing through the storm sewer system to an industrial area in Carol Stream. No definitive source could be located. The sheen was concluded to have been caused by a leak or spill on the roadway.
3/15/2025	Downers Grove/Lisle	Oil sheen	Oil booms were deployed in the creek to contain, and staff worked with the Villages of Downers Grove and Lisle to trace the sheen upstream to a storm sewer in Downers Grove. A source could not be determined. Staff spoke to business owners in the area.
5/25/2024	Elmhurst	Release of firefighting foam	Release of firefighting foam into a ditch along I-290. Staff verified no release offsite or into downstream waterways.
4/1/2024	Lisle	Post Storm	No concern
4/2/2024	Lisle	Post Storm	No concern
4/4/2024	Lisle	Post Storm	No concern

2024-2025 ANNUAL FACILITY INSPECTION REPORT

DUPAGE COUNTY NPDES PERMIT # ILR400502

4/8/2024	Villa Park	Oil sheen	Villa Park contacted the Stormwater Management department regarding a report of an oil slick on a roadway. Staff responded to the site, but due to heavy rains, no oil sheen could be located on the roadway or downstream waterways. Findings were reported back to the Village.
4/10/2024	Downers Grove	Spill in roadway ditch	Unknown white substance in a Village owned right of way ditch. Stormwater Management staff sampled and conducted tests on the material. It was concluded to be lime or concrete which was spilled or dumped on the roadway. Findings were reported back to the Village.
4/23/2024	West Chicago	Gasoline spill	Remediation was conducted by an environmental cleanup company. Staff verified no release into downstream waterways.
5/2/2024	Winfield	Fish kill report	Stormwater Management staff investigated and concluded that the die off was a natural cause due to low dissolved oxygen caused by changes in temperature.
5/8/2024	Westmont	ComEd transformer spill	ComEd responded immediately, secured area and cleaned spill, ongoing monitoring of the storm sewer system to ensure all was mitigated.
5/20/2024	Itasca	Ink spill	Business contracted to clean up the material.
5/28/2024	Woodridge	Dumping const. debris on private property	No stormwater implication found - advised property owner and County
6/4/2024	Naperville	Washington Street Bridge Reconstruction - Barrier Leak	Curtain adjusted and sandbags added
6/11/2024	Naperville	Washington Street Bridge Reconstruction - Filter Bag Failure	Pumping stopped and filter bag replaced
7/7/2024	Willowbrook	Fuel station spillage	Remediated by SET Environmental over multiple days
7/15/2024	Naperville	Washington Street Bridge Reconstruction - River Flooding	Waited for river to recede

2024-2025 ANNUAL FACILITY INSPECTION REPORT

DUPAGE COUNTY NPDES PERMIT # ILR400502

7/22/2024	Addison	Fuel spill at gas station. Pump left unattended. 415 N Swift Rd.	Contents removed by contractor. Spill was contained to one (1) storm inlet on private property. No release to the public waterway.
7/30/2024	Bensenville	Leaking underground storage tank	Staff verified no release offsite or into waterways and that there was no release beyond the immediate tank area.
8/2/2024	Naperville	Leaking underground storage tank	Staff verified no release offsite or into waterways and that there was no release beyond the immediate tank area.
8/2/2024	Bensenville	Diesel fuel spill due to vehicle collision	Remediation was conducted by an environmental cleanup company. Staff verified no release into downstream waterways.
8/8/2024	Wheaton	Oil sheen	Determined the sheen to be used cooking oil. Public Works cleaned up using a Vac-Truck. The spill was contained to the forebay of the basin and there was no release into the rest of the pond or downstream.
8/16/2024	Carol Stream	Diesel fuel spill due to vehicle collision	Heavy rains came through while staff was on route to the site resulting in some of the fuel being released into Klein Creek. Once staff arrived at the site, booms were deployed in the sewer system and roadway to contain the spill. The County's on-call HazMat contractor arrived shortly after and worked with County staff on additional placement of booms. The fuel was traced downstream, and booms were placed in Klein Creek. Staff was in contact with IEPA during and after containment and remediation.
9/9/2024	Naperville	North Central College - Cloudy water reported at river outlet	Staff inspected after report and outlet discharge was clear

2024-2025 ANNUAL FACILITY INSPECTION REPORT

DUPAGE COUNTY NPDES PERMIT # ILR400502

9/9/2024	Villa Park	Oil spill from leaking vehicle	Stormwater staff placed an oil boom into the catch basin to capture the oil. The storm sewer system and Sugar Creek were inspected to ensure no release of oil downstream. The property management company used oil dri to clean any oil remaining on the parking lot surface
9/16/2024	West Chicago	MAPEI Corporation Fire Suppression Foam System Discharge into Public Water Ways.	MAPEI hired a cleanup response company who cleaned the storm lines and vacuumed any residual foam. MAPEI sent an incident summary report to the IEPA on 9-19-24.
9/24/2024	Bensenville	Fuel spill due to punctured saddle tank	Spill site was cleaned up at the time the report was made. Staff determined that the location of the spill would drain into O'Hare Airport property and Cook County and coordinated with MWRD spill responder who verified no release downstream.
10/10/2024	Unincorporated	Traffic accident / diesel spill	A towing company had deployed a spill containment pool and applied oil dri to the pavement surface. Staff responded to the site and found additional fuel in the storm sewer system and in a retention pond. Stormwater Management coordinated with Illinois EPA and the trucking company on the additional cleanup needed. An environmental cleanup company was contracted by the responsible party to complete remediation
11/19/2024	Willowbrook	Truck fuel spillage	Remediated by truck owner same day
12/3/2024	Lombard	Leaking underground storage tank	The tank was reported during site redevelopment. Staff verified no release offsite or into waterways and that there was no release beyond the immediate tank area.
1/1/2025	Downers Grove	January 2025 - Citizen complaint about algae treatment	Information about product used obtained from property manager
1/21/2025	Bloomingtondale	Equipment leak	Village of Bloomingtondale who worked with the property owner to remediate the spill as well as address an improperly covered salt pile that was also observed onsite.

2024-2025 ANNUAL FACILITY INSPECTION REPORT

DUPAGE COUNTY NPDES PERMIT # ILR400502

1/29/2025	Unincorporated	Red dye in stream	Red dye reported in a tributary to the West Branch DuPage River. Stormwater staff responded to the site and found sediment laden water flowing at this location. The flow was traced upstream and determined to be associated with a broken water main. This was confirmed by the City of West Chicago who was working to repair the main.
Annual dry inspections of outfalls	Glen Ellyn	N/A	No issues detected
Quarterly	Addison Township	Stormwater Facility Report	N/A

C5. Illicit Source Removal Procedures

Goal:

The number of advertisements or promotions of the IDDE reporting phone line or Citizen Reporter App.

Milestone:

Advertise or promote the IDDE Hotline or Citizen Reporter App 5 times through publications, notices, and events.

Status:

DuPage County staff maintains the “Citizen Reporter App” which provides citizens the opportunity to participate in the water quality program by identifying areas for water quality improvements. By using the app, citizens can report water quality issues such as erosion, stream blockages, algae, dumping, sediment, garbage, and other water quality issues. The Citizen Reporter App can be accessed at:

<https://gis.dupageco.org/CitizenReporter/>

County staff has created 22 brochures and flyers for distribution as discussed earlier in the education and outreach section of this report. Many of these include a link to the Citizen Reporter App. These publications are distributed at each event the County attends as an exhibitor (also discussed in education and outreach section). These documents are available on our website at:

https://www.dupagecounty.gov/government/departments/stormwater_management/water_quality/outreach_materials.php

From March 1, 2024, through February 28, 2025, a total of 31 reports were received through the Citizen Reporter App. Reports included observations on stream blockages, fish kills, algae blooms, and other

waterway concerns. Reports are addressed directly by DCSM staff, forwarded to municipalities, or used for planning purposes as appropriate.

C7. Visual Dry Weather Screening

Goal:

The number of MS4 outfalls visually screened per watershed per year.

Milestone:

Inspect, during dry weather, all known outfalls within the West Branch DuPage River watershed that fall within co-permittee jurisdictional areas. Additionally, all priority outfalls will be inspected.

Status:

West Branch DuPage River outfalls and all priority outfalls from throughout the county were the focus for the 2024 season. 1,390 outfalls were visually inspected for illicit discharges. DuPage County staff used the ESRI ArcGIS Field Maps app for outfall inspections. This allows us to track outfall inspections digitally, eliminating the need for paperwork. Outfall inspection and testing information is entered directly into the database, which is also linked to the outfall map. The storm sewer inventory has also been converted into the Field Maps app. This allows staff to view the storm sewer atlas on a tablet or smartphone, which increases efficiency in illicit discharge tracing.

Kayaks increased outfall monitoring efficiency along the West Branch DuPage River. Observing outfalls from the water proved much faster and safer than driving and hiking to the riverbank. In addition, observers were able to record river conditions that are not visible when inspecting outfalls from the shoreline.

C8. Pollutant Field Testing

Goal:

Number of visually suspect dry weather discharges that are chemically tested.

Milestone:

Chemically test all visually suspect dry weather discharges that are observed.

Status:

One of the 1,390 outfalls monitored in 2024 was releasing a suspect discharge and sampled. Many outfalls with flow had no observable indication of illicit discharges, such as color, odor, turbidity, or floatables. Of the 118 outfalls monitored in the East Branch DuPage watershed, 8 had non-suspicious discharge. Of the 92 outfalls monitored in the Salt Creek watershed, 11 had non-suspicious discharge. Of the 1,173 outfalls monitored within the West Branch DuPage watershed, 85 had non-suspicious discharge. Finally, none of the 7

2024-2025 ANNUAL FACILITY INSPECTION REPORT

DUPAGE COUNTY NPDES PERMIT # ILR400502

outfalls monitored within the Fox or Des Plaines watersheds had any discharge. The following table shows the water quality data for the outfall that was sampled out of the 1,390 inspected outfalls. The discharges were traced to their source and identified as non-illicit.

Inspection Date	Discharge	Color	Odor	Turbidity	Floatables	pH (SU)	Temp (C)	Specific Conductance (uS/cm)	Ammonia (mg/L)	Surfactants (mg/L)	Flouride (mg/L)	COMMENTS
8/22/2024	Moderate	Clear	None	None	Oil	6.5	0	0	0	0	0	Oil test strip negative. Upstream flow is clear, no oil. Most likely small amount of residual oil on system

C9. Public Notification

Goal:

In the event of a large-scale release of pollutants to Waters of the State that has potential for human health impacts, DCSM will work with Emergency Management officials to notify affected community officials as well as issue a press release.

Milestone:

Notify affected parties in the event of a large-scale release of pollutants into Waters of the State that has potential health impacts.

Status:

No large-scale release of pollutants into Waters of the State with potential health impacts occurred from the permit area during the monitoring year. DuPage County and co-permittees collaborated on response and notification to downstream communities during the following incident:

Diesel Fuel Spill, Bensenville, September 24, 2024

Stormwater Management received a Hazardous Materials Incident Report regarding a diesel fuel spill due to a punctured saddle tank on a semi-truck in Bensenville. The spill site was cleaned up at the time the report was made. Staff determined that the location of the spill would drain into O'Hare Airport property and Cook County and coordinated with MWRD spill responder who verified no release downstream.

D. Construction Site Runoff Control

D1. Regulatory Control Program

Goal:

Update the Ordinance as needed to ensure that sediment and erosion control provisions are up to date and reflect the current best practices

Milestone:

Review and update, if necessary, the Ordinance to reflect current best practices for soil erosion and sediment control

Status:

Article VII of the DuPage County Stormwater and Flood Plain Ordinance outlines sediment and erosion control requirements. No revisions were made to Article VII during the reporting year. Co-permittees within DuPage County follow the Countywide Ordinance. Those MS4s whose boundaries fall outside the DuPage County limits may follow County or municipal Ordinances, all of which must be as stringent as the ILR40 soil erosion and sediment control regulations at a minimum.

D2. Erosion and Sediment Control BMPs

Goal:

The DuPage County Countywide Stormwater and Flood Plain Ordinance requires temporary and permanent soil erosion and sediment control for developments over one acre to prevent the discharge of pollutants into waterways. Number of development sites over one acre requiring soil erosion and sediment control.

Milestone:

Require sediment and erosion control on 100% of development sites over one acre.

Status:

DuPage County co-permittees have enacted the construction site erosion control and post-construction best management practice regulations of the DuPage County Countywide Stormwater and Flood Plain Ordinance or regulations at least as stringent as those in the DuPage County Ordinance. Municipalities elect to have DuPage County review development permits on their behalf (non-waiver community) or waive the County review and perform these reviews in house by qualified staff (complete waiver community) or defer to the County for certain development reviews such as those involving floodplain or wetlands (partial waiver community). The waiver status of each co-permittee is listed below. DuPage County reviews all site development permits in

2024-2025 ANNUAL FACILITY INSPECTION REPORT

DUPAGE COUNTY NPDES PERMIT # ILR400502

Unincorporated DuPage County which includes the Townships. Communities whose jurisdictions extend beyond the DuPage County limits may opt-in entirely to the DuPage County Stormwater Ordinance, opt-out into the neighboring county's regulations, or enforce both county's regulations.

During the reporting year, each co-permittee that issued development permits required soil erosion and sediment control for sites over one acre (and in many cases all size developments) to minimize the discharge of pollutants into waterways. Records are kept within each regulatory agency office.

MUNICIPALITY	ILR40 Permit #	Co-Permittee Bureau ID	DuPage County Stormwater Ordinance Waiver Status

D4. Site Plan Review Procedures**Goal:**

The DuPage County Countywide Stormwater and Flood Plain Ordinance requires a Stormwater Permit for developments over a certain threshold of site disturbance as well as developments in wetlands, buffers, and floodplain. All development permits are reviewed for soil erosion and sediment control. The County and Municipal permit partners have successful regulatory permitting programs under the DuPage County Countywide Stormwater and Flood Plain Ordinance and will continue to implement and update these programs as necessary.

Milestone:

Review soil erosion and sediment control plans for 100% of development permits over one acre.

Status:

All co-permittee MS4s with development permit review authority reviewed soil erosion and sediment control plans for 100% of development permits over one acre (and in many cases all size developments). Records are kept within each regulatory agency office.

D5. Public Information Handling Procedures**Goal:**

DuPage County Citizen Reporter App allows residents throughout the partnership area to report water quality issues, including soil erosion and sediment control complaints. The County addresses complaints within unincorporated and non-waiver areas. Complaints generated from Full Waiver or Partial Waiver Communities are forwarded to the Municipality. The County and Municipalities also receive and respond to soil erosion and sediment control concerns sent directly from the public through phone and email reports. Number of soil erosion and sediment control reports addressed per year.

Milestone:

Investigate and track all soil erosion and sediment control reports to the County and Municipalities each year.

Status:

Reports regarding soil erosion and sediment control from developments are submitted to the County as well as municipalities. Co-permittees communicate with one another to share reports and locate possible sources from development sites. All soil erosion and sediment control complaints were investigated by the County or the municipality during the reporting year. Records are kept within each regulatory agency office.

D6. Site Inspection/ Enforcement Procedures**Goal:**

Inspect all development sites to ensure the soil erosion and sediment control requirements are being met. County and Municipal inspectors enforce soil erosion and sediment control regulations and conduct regular inspections to ensure compliance. Inspection reports are kept within each regulatory agency for tracking and reporting purposes.

Milestone:

Continue with site inspections and code enforcement procedures. Ensure staff has proper qualifications to conduct soil erosion and sediment control inspections.

Status:

Under the DuPage County Countywide Stormwater and Flood Plain Ordinance, co-permittee villages and cities may elect to review and inspect development sites for soil erosion and sediment control, or they may elect to defer oversight to DuPage County. Each co-permittee that issued development permits inspected for soil erosion and sediment control measures at sites over one acre (and in many cases all size developments) to minimize the discharge of pollutants into waterways. Records are kept within each regulatory agency office.

E. Post- Construction Runoff Control

E2. Regulatory Control Program

Goal:

The post construction runoff rate is restricted through the Countywide Ordinance which requires all developments increasing impervious area by 2,500 square feet or more to include Post Construction Best Management Practices. Continue to require post construction best management practices in accordance with the Countywide Ordinance. Implementing and utilizing the DuPage County BMP Manual will reduce post construction runoff pollutants and will ensure discharge from developed sites will be treated.

Milestone:

Work through the Municipal Engineers Group to update Technical Guidance regarding Post Construction BMPs. Review and revise the Ordinance and/ or BMP Manual as needed to reflect new information and standard practices.

Status:

The DuPage County Countywide Stormwater and Floodplain Ordinance (DCCSFO) is continually reviewed to determine if updates are needed. As the DCCSFO is a countywide ordinance, the regulations apply to the entire county and all municipalities must be at least as stringent as the DCCSFO. Following review and discussions, staff determined the BMP section of the DCCSFO will require an update. This revision is being discussed and evaluated with cooperation from co-permittee agencies.

A subgroup to the DuPage County Municipal Engineers group was created to provide technical assistance and guidance materials. This subgroup generated sample specifications for a dry well, permeable paver system, and rain garden which has been made available online. The samples are used as a template for the design of these practices on residential properties. The group continues developing inspection checklists for long term maintenance and monitoring.

E3. Long Term O&M Procedures

Goal:

The Countywide Ordinance requires site runoff storage facilities to be put into an easement. All Post Construction BMPs with a tributary area greater than one (1) acre require a three-year maintenance and monitoring period. Require and accept easements over site runoff storage facilities and maintenance and monitoring periods for BMPs with a tributary area of one acre or more.

Milestone:

Continue to enforce easements and maintenance/ monitoring periods as required in the Countywide Stormwater Ordinance.

Status:

Under the DuPage County Countywide Stormwater and Flood Plain Ordinance, co-permittee villages and cities may elect to review and inspect development sites, or they may elect to defer oversight to DuPage County. Each co-permittee that issued development permits required easements over site runoff storage facilities and required three-year maintenance and monitoring periods for BMPs on sites with a tributary area of over one acre (and in many cases all size developments) to minimize the discharge of pollutants into waterways. Records are kept within each regulatory agency office.

E4. Pre-Construction Review of BMP Designs**Goal:**

The DuPage County Countywide Stormwater and Flood Plain Ordinance requires developments to provide post construction BMPs when impervious cover thresholds exceed 2500 square feet. The DuPage County BMP Manual provides guidance on the design and implementation of development practices that prevent stormwater quality degradation and enhance the overall quality of stormwater. The BMP Manual promotes and gives guidance on the installation of vegetated filter strips, vegetated swales, infiltration systems, permeable pavers, manufactured structures, and stormwater detention BMPs such as dry detention basins, wet detention basins, constructed wetland detention basins, and underground detention basins.

Milestone:

Review site development plans for compliance with the BMP sections of the Ordinance and document number of reviews

Status:

Under the DuPage County Countywide Stormwater and Flood Plain Ordinance, co-permittee villages and cities may elect to review and inspect development sites, or they may elect to defer oversight to DuPage County. Current waiver status is shown in the table in Section D.2. Each co-permittee that issued development permits required post construction BMPs on sites when impervious cover thresholds exceeded 2500 square feet (or less in some communities). Permit records are kept within each reviewing agency.

E5. Site Inspections During Construction**Goal:**

DuPage County Stormwater provides annual training opportunities for all co-permittee staff and contractors to ensure that all employees and contractors who manage or are directly involved in routine maintenance, repair,

or replacement of public surfaces in current green infrastructure or low impact design techniques applicable to such projects to ensure that they are able to identify proper BMP installation during construction. Each co-permittee shall keep internal records of staff and contractor training.

Milestone:

Appropriate staff and contractors of each co-permittee shall attend training on green infrastructure and low impact design.

Status:

Green Infrastructure Maintenance training was held in person for the 2024-2025 reporting year.

Event	Date	Location	Attendees
Green Infrastructure Seminar	2/13/2025	Medinah Shriner Center - 550 Shriners Dr, Addison, IL	143

As DCSM has hosted and recorded a suite of webinars on Green Infrastructure Maintenance in recent years, these recorded trainings were compiled and are shared with staff and co-permittees to watch as a refresher or for those who are unable to attend the in-person training:

Records of Green Infrastructure Maintenance staff training are kept internally by each co-permittee.

Green Infrastructure Maintenance webinars can also be found on the DuPage County Stormwater Love Blue Live Green YouTube page <https://www.youtube.com/@DuPageSWM>.

E6. Post-Construction Inspections

Goal:

Conduct post construction inspections at sites containing BMPs with a native vegetation component for the duration of the establishment period or until performance standards are met. The number of post construction inspections performed per year on sites containing native vegetation BMPs during the establishment period.

Milestone:

Inspect 100% of sites containing native vegetation BMPs during the establishment period.

Status:

Under the DuPage County Countywide Stormwater and Flood Plain Ordinance, co-permittee villages and cities may elect to review and inspect development sites for post construction BMPs, or they may elect to defer oversight to DuPage County. Co-permittees can delegate this role to DuPage County, complete it with in-house staff, or hire a consultant to complete the work. Records are kept within each regulatory agency office.

F. Pollution Prevention/ Good Housekeeping

F1. Employee Training Program

Goal:

Staff members attending training on green infrastructure and practices that will minimize the discharge of pollutants from municipal operations into the storm sewer system.

Milestone:

Appropriate staff of each co-permittee shall attend training on pollution prevention in municipal operations. Ensure new staff are trained in best practices and good housekeeping.

Status:

Pollution Prevention training was held in person for the 2024-2025 reporting year.

Event	Date	Location	Attendees
Pollution Prevention Seminar	11/7/2024	Bloomington Golf Club - 181 N Glen Ellyn Rd, Bloomington, IL	163

As DCSM has hosted and recorded a suite of webinars on Pollution Prevention in municipal operations in recent years, these recorded trainings were compiled and shared with staff and co-permittees to watch as a refresher and for those who were unable to attend the in-person training.

Records of Pollution Prevention staff training are kept internally by each co-permittee.

Pollution Prevention webinars can also be found on the DuPage County Stormwater Love Blue Live Green YouTube page <https://www.youtube.com/@DuPageSWM>.

During the reporting period March 1, 2024 to March 31, 2025, nine (9) chloride reduction workshops were held. The workshops were held in person as well as in a webinar format allowing the groups to collaborate and host the workshops jointly. The workgroup staff for the DRSCW, LDRWC, Lower Des Plains Watershed Group (LDWG) and Chicago Area Waterways Chloride Workgroup (CAWCW) collaborated with staff from Lake County DOT and Health Dept.

to coordinate the workshops. Registration was made available to agencies over a wide area of Illinois resulting in staff attending from Champaign, Cook, DuPage, Fulton, Kane, Kendall, Lake, McHenry and Will Counties.

The 2024 in-person Public Roads Winter Best Practices Workshops were held on Sept. 17, Sept. 24, and Oct. 3, 2024. Public Roads webinars were held on Oct. 8, Oct. 15, and Nov. 19, 2024. Staff from The Conservation Foundation were engaged to present the material. A registration fee was required per person for the in-

person workshops and per agency in order to view each webinar. The webinar links were shareable within an agency. A survey was provided at the end of each webinar to those who had signed in asking for the number of attendees from each agency and for an evaluation of the workshop. Evaluation surveys were also provided at the in-person workshops. The survey results indicated that a minimum of 870 persons attended the five 2024 Public Roads workshops. Certificates of attendance were provided to those who requested them. A link to the Minnesota Snow and Ice Control: Field Book for Snowplow Operators was provided to each registrant.

The Parking Lots and Sidewalks Winter Best Practices Workshop webinars were held on Sept. 26 and Nov. 13, 2024 and one in-person workshop was held on Oct. 1, 2024. The Workshops were presented by staff from The Conservation Foundation through the Salt Smart Collaborative. The survey results indicated that there was a minimum of 425 persons who attended the Workshops. Certificates of attendance were provided to those who requested them. The surveys provided an opportunity to provide an evaluation on the webinars. A link was sent to each registrant for the Illinois Winter Maintenance Manual for Parking Lots and Sidewalks developed by the Salt Smart Collaborative (developed in part by a Section 319 Grant issued by IEPA).

F2. Inspection and Maintenance Program

Goal:

DCSM provides guidance materials on good housekeeping for municipal operations. Each co-permittee has developed specific inspection and maintenance procedures for equipment and facilities. Each co-permittee is responsible for ensuring that equipment and facilities are inspected and maintained during day-to-day operations to minimize discharge of pollutants into Waters of the State.

Milestone:

Continue good housekeeping program of inspection and maintenance of equipment and facilities related to the prevention of pollution in stormwater.

Status:

Co-permittees oversaw their day-to-day activities in accordance with best practices to minimize pollutants into waterways. Records are kept internally within each office and are available upon request. DCSM created a Quarterly Facility Inspection Checklist and distributed to all co-permittees for use in these inspections.

F3. Municipal Operations, Stormwater Control

Goal:

Co-permittees have each developed their own schedules for street sweeping as well as storm sewer inspection, clean-out, and maintenance. A standard minimum schedule will be developed for partner agencies.

Milestone:

Provide guidance and minimum recommended schedules to co-permittees to influence timing and frequency of street sweeping, storm sewer inspection, clean-out, and maintenance schedules to minimize pollutants from stormwater runoff from roadways and storm sewers.

Status:

In 2023, DuPage County Stormwater Management contracted with Baxter & Woodman to evaluate current practices in street sweeping, storm sewer inspection, clean-out, and maintenance by the County and municipalities and to develop guidance on best practices for minimizing pollutants from these systems into waterways. Under this contract, fact sheets were created on street sweeping as well as storm sewer and catch basin inspection and cleanout. These materials are distributed to co-permittees.

DuPage County Stormwater also maintains educational videos for MS4 staff on Street Sweeping and Catch Basin Maintenance.

<https://www.youtube.com/watch?v=Vv3Hvb1sNhM>

<https://www.youtube.com/watch?v=TNJULlrP8b4>

F4. Municipal Operations Waste Disposal**Goal:**

Following storm sewer maintenance and cleanout activities, waste must be properly disposed of. DuPage County Public Works offers a Regional Vactor Receiving Station. The station is part of a shared services initiative. It reduces the cost of disposal of public works waste and aims to keep pollutants out of area water supplies. The station processes the debris collected by public works and transportation vacuum tanker trucks. The waste is then separated into liquids and solids. The liquids are treated through the county's wastewater treatment facility, while the solids are dried and eventually transferred to the garbage dump.

Milestone:

Co-permittees shall properly dispose of waste generated from storm sewer maintenance and cleanout. Continue to offer disposal facilities such as the Regional Vactor Receiving Station.

Status:

During the reporting year, co-permittees continued current practices to properly dispose of waste generated from storm sewer maintenance and cleanout. DuPage County continued to offer disposal facilities such as the Regional Vactor Receiving Station.

F5. Flood Management/ Assess Guidelines**Goal:**

The number of completed watershed plans, or components thereof, approved by the Stormwater Management Planning Committee and County Board per year.

Milestone:

Complete or implement one watershed plan

Status:

The Lacey Creek Watershed Plan was completed in October 2024 and is available on the DuPage County website.

During the reporting year, the following water quality projects were completed. These projects contributed to the implementation of previously completed Watershed Plans.

Project Name	Project Owner	Watershed Plan	Project Type
Luther High Ridge Storm Sewer	DuPage County/ York Township	Sugar Creek Watershed Plan	Flood Control
Klein Creek Streambank Stabilization Phase III	Carol Stream	Klein Creek Watershed-Based Plan	Streambank Stabilization

F6. Other Municipal Operations Controls**Goal:**

Evaluate and encourage pre-wetting and anti-icing measures to reduce chloride runoff into waterways from roads and public surfaces. Deployment and use of pre-wetting and anti-icing measures.

Milestone:

Provide guidance and recommendations to co-permittees on pre-wetting and anti-icing techniques to reduce chloride runoff.

Status:

The DRSCW has attempted to track adoption of sensible salting BMPs in the program area since 2007. This is done as ambient chloride concentration monitoring; and while the ultimate indicator of success, it has proven an imperfect metric for tracking efficiency trends in winter salt use. Tracking target BMP adoption in the program area allows the DRSCW to evaluate the success of the chloride management workshops. Historically the public roads and parking lots/sidewalks workshops have covered the following practices:

- Winter Weather tracking and planning
- Behavior of commonly used deicing compounds

- Product and chemical alternatives
- Equipment calibration training
- Application Rates
- Equipment and salt application advancements
- Salt usage, storage and deicing best management practices
- Example salt use policies and management plans

The questionnaires also help identify topics for future workshops, and form suppositions about salt use per unit of service expended inside the program area relative to 2006 levels. Questionnaires were distributed in 2007, 2010, 2012, 2014, 2016, and 2018. They were sent to approximately 80 municipal highway operations and public works agencies. A new questionnaire was due to be distributed in 2022 but was not completed due to a need to rework elements of the questionnaire. It is now due to be issued in May/June 2025.

SECTION C

Monitoring Data

DuPage County in partnership with the cooperating municipal and township permit holders listed in the cover letter have collected a substantial amount of information, including monitoring data, during the reporting period as members of the DuPage River Salt Creek Workgroup. Some co-permittees are also members of the Lower Des Plaines Watershed Group and/ or the Lower DuPage River Watershed Coalition.

Watershed Workgroup quality monitoring program is made up of two components: 1) Bioassessment and 2) DO monitoring. Monitoring data is included as an attachment to this report.

SECTION D

Proposed activities during the next reporting cycle:

During the next reporting cycle, the activities listed in the 2021 NOI will be implemented until a new ILR40 is issued by IEPA. Updated NOIs will be submitted, as needed, according to the latest ILR40 requirements.

SECTION E

Reliance on other government entities:

The co-permittees listed in the cover letter rely on established DuPage County programs to satisfy some of the General NPDES Permit No. ILR40 obligations for the six minimum control measures: Public Education and Outreach, Public Participation/ Involvement, Illicit Discharge Detection and Elimination, Construction Site Runoff Control, Post-Construction Runoff Control, and Pollution Prevention/ Good Housekeeping. Responsibilities of each entity are outlined in our Notice of Intent and Intergovernmental Agreements.

SECTION F

List of construction projects:

Agency	Project
Addison	Oak-Chestnut-North-State Utility & Roadway Improvements
	Michael Lane Watermain Replacement and Resurfacing Project
	2024 Reconstruction and Drainage Program
	Annual Street Maintenance Project - MFT
	Lombard Road South Resurfacing Project
	Armitage Avenue Sidewalk Project
Addison Township	Pollinator Meadows Conservation initiative ongoing
	Tree replacement program ongoing
	Kingery Highway Frontage Roads Manhole replacement
	Diseased tree identification and eradication ongoing
Bartlett	Devon Excess Flow Lift Station & Force Main Project
	2024 Water Main Replacement Project - Complete
	Bittersweet WRF Rehab - Completed in 2024
Bensenville	21.1.03 – Main St & Church Rd Resurfacing
	22.1.02 - Bryn Mawr & Birginal Reconstruction
	22.2.02 – Water Supply PA Station Replacement
	22.5.02 - Addison Creek Storm Sewer Imp. – Phase II
	23.1.03 – Browngate Roadway and Water Main Improvements
	23.1.06 – Sesame Street Reconstruction
	23.4.01 – 2022 CDBG Residential Street Lighting
	23.8.01 - 2023 MFT HMA Pavement Patching
	24.1.01 – 2024 Residential Street Improvements
	24.1.04 – Eastview Avenue Reconstruction
	24.6.27 – Village Hall Parking Lot Reconstruction
	23.5.02 – 2025 Addison Creek Tree & Veg Clearing
	24.8.01 - 2024 MFT Sidewalk Replacement
	24.8.02 - 2024 MFT Sidewalk R&R
	24.8.03 – Pavement Rejuvenation
	24.8.04 - 2024 MPI Sewer Lining
	24.8.05 - 2024 Sidewalk Cutting
	23.8.06 - 2024 Thermoplastic Pavement Marking
Bloomingtondale	Prairie Lakes Stormwater Improvements (aka Indian Lakes), started late 2024
	Leavitt Pond at Leslie Park - Detention basin dredging and wetland planting (erosion control), completed 2024
	Annual Storm Sewer Cleaning & Televising
	Street Sweeping (April to November)
Bloomingtondale Township	2025 road resurfacing

2024-2025 ANNUAL FACILITY INSPECTION REPORT

DUPAGE COUNTY NPDES PERMIT # ILR400502

	Mallard Lake drainage improvements
Burr Ridge	2024 Road Program Resurfacing Contract
	Elm Street Culvert & Streambank Project
	Oak Hill Court Culvert Replacement Project
Carol Stream	Klein Creek Streambank Stabilization - Section III
	Public Works Yard & WRC Improvements
Downers Grove	S-006 2024 Sidewalk Replacement / Rehab
	S-008 ROW Accessibility Improvements
	ST-009 2024 Block Retaining Wall Rehab/Replacement
	ST-004 2024 Resurfacing / Crack Sealing / Fall Patching
	SL-003 Streetlight Replacement Program (energy efficient)
	SW-069 Bioswale installations
	ST-045 Bridge Inspections / Repair
	ST-058/WA-028 Indianapolis Reconstruction / Watermain / Drainage Improvements
	SW-070 Drainage System Maintenance (Ditching and outfall repair)
	SW-073 DBD Water Quality (2 new WQ structures)
	SW-098 Curtiss and Glenview Drainage Improvements (incl WQ structure)
	SW-100 Fairview Drainage Improvements - 6th to 8th
	SW-101 Blodgett - Summit to Randall Drainage Improvements
	SW-102 Washington Drainage Improvements
	SW-104 5610 Lyman Demolition (house in the floodway)
	TR-030 Traffic Signal Modernization
	TR-033 Main Street Road Diet
Downers Grove Township	Paving, sidewalk and curb replacement and ditching and culvert replacement
	Tree trimming and tree removal
DuPage County	Nordic WWTP rebuild
	WGV headworks
	WGV & Knollwood Electrical upgrades
	Waterfall Glen lift station rehab
	DuPage County Campus Sidewalk and Pavement Improvements
	Crisis Recovery Center
	Care Center Entrance
	Animal Services Building
	Luther Avenue Drainage Improvement Project, unincorporated Lombard
	Smith & Cambridge Drainage Improvement Project, unincorporated West Chicago
	Country Club Highlands Ph II, unincorporated Elmhurst
	Main Street Storage Project, Lisle
	Tamarack Drainage Project, unincorporated Glen Ellyn
	Lufkin Pond Expansion Project, Villa Park
Elmhurst	2024 Ditch Cleaning and Maintenance
	2024 Watermain Project

2024-2025 ANNUAL FACILITY INSPECTION REPORT

DUPAGE COUNTY NPDES PERMIT # ILR400502

	2024 Sanitary Manhole Rehab and Sanitary Sewer Lining
	2024 Sanitary Sewer Repair Program - 1st Street
	2024 Contract Paving
Glen Ellyn	2024 Street Improvements Project
	2024 Parking Lot Resurfacing and Asphalt Roadway Patching Program
	2024 Sidewalk and Concrete Street Repair Program
	2024 Downtown Streetscape Project
	2024 Crescent Boulevard Reconstruction
Glendale Heights	Klein Creek Maintenance & Monitoring
	East Branch Tributary 2 Maintenance & Monitoring
Hanover Park	2024 Resurfacing
	2024 Watermain Replacement
	2024 Hydrant Painting
	2024 Pavement Rejuvenation
	2024 Cracksealing
	Village Parking Lot Maintenance
	Sidewalk, Curb & Gutter Replacement
	SSA 5 Pavement Repairs
	Springinsguth - West Branch DuPage River Stream Corridor Improvements
Hinsdale	Charleston Road Drainage Project
	Second Street Water Main Replacement
	2024 Resurfacing Program
Lemont	Hillview DR water main replacement
	Logan ST water main replacement
	Derby RD Water Tower
Lisle	Pedestrian Canopy Improvement
	Warrenville Road Bridge Improvement Design
	Pebble Creek Bridge Replacement
	Stormwater Improvements - Burlington Ave Reconstruction - Phase I Engineering
	Stormwater Improvements - Village Center and Main Street - Construction
	Lisle Levee Improvements Program
	Scarlet Oaks Stormwater Improvement
	Old Tavern Road Culvert Rehabilitation
Lombard	Large Diameter Combined Sewer Lining
	Downtown Sidewalks
	22nd St Bikeway
	St Charles Rd Resurfacing
	641 N Main St Storm Water Basin
	North Grace St Utility Improvements
Milton Township	Road Resurfacing/Patching Projects in:
	Gary Ave. Gardens

2024-2025 ANNUAL FACILITY INSPECTION REPORT

DUPAGE COUNTY NPDES PERMIT # ILR400502

	Herrick Dr. & Coventry Dr.
	Woodland Dr. & Prairie Ave.
	Plamondon Rd., Picadilly
	Various roads in Butterfield East
	Wheaton Ridge & various roads in Milton Township
	Culvert Lining- Lloyd Ave., Lombard
Naperville	BR031 - Downtown Washington Street Bridge Replacement
	CS006 - New Sidewalk Improvements
	CS015 - Downtown Streetscape: Washington Street - Chicago to Benton
	MP004 - Sidewalk & Curb Replacement Program
	MP009 - Street Maintenance Improvement Program
	MP018 - ADA Sidewalk Improvements
	PA020 - Annual Tree Planting Program
	PA022 - Annual Riverwalk Rehabilitation Program
	PA054 - Native Vegetation Management Program
	PA059- Riverwalk Prairie Nature Garden
	SC019 - Columbia St.: Monticello Dr. to Fifth Av./Plank Rd
	SC259 - Sylvan Circle and E. Porter Avenue Watermain and Roadway Improvements
	SW001 - Annual Stormwater Management Projects
	SW017 - Storm Sewer Lining Program
	SW026 - Stormwater System Upgrade and improvement Program
	SW037 - Corrugated Metal Pipes (CMP) Repair & Replacement Program
	TC223 - 95th & Skylane Signal Modification
	WU004 - Water Distribution System - Rehabilitation / Replacement
	WU005 - Water Utility Infrastructure Relocations - Miscellaneous Locations
	WU010 - Water Distribution System - Additions/Extensions
	WU037 - Lead Service Replacements 1
	WU041 - Fire Hydrant Replacement Program
	WU042 - Water Main Valve Replacement Program
	WU045 - Bulk Water Stations
	WU052 - Water main Lining Program
	WU402 - River Road Watermain Improvements
	WU410- Saybrook Phase 2 Watermain Improvements
	WW006 - Sanitary Sewer System - Rehabilitation/Replacement Program
	WW010 - Sanitary Sewer Capacity Improvements
Oak Brook	Golf Course Parking Lot
	Golf Course Driving Range Pad
	Briarwood Lakes watermain replacement
	Community-wide Roadway Resurfacing Program
Roselle	2024 Storm Sewer Improvement Program
Villa Park	Jackson Area Phase IV Stormwater Improvements
	Harvard Avenue Reconstruction

DuPage River Salt Creek Workgroup

DRSCW ILR40 Activities March 2024– March 2025

PART I. COVERAGE UNDER GENERAL PERMITS ILR40

Not applicable to the work of the DRSCW.

PART II. NOTICE OF INTENT (NOI) REQUIREMENTS

Not applicable to the work of the DRSCW.

PART III. SPECIAL CONDITIONS

Not applicable to the work of the DRSCW.

PART IV. STORM WATER MANAGEMENT PROGRAMS

A. Requirements

Not applicable to the work of the DRSCW.

B. Minimum Control Measure

1. Public Education and Outreach on Stormwater Impacts

DRSCW outreach activities for the reporting year ending March 31, 2025 included:

- The DRSCW and Salt Smart websites were updated and maintained during the reporting period and periodically updated with presentations and material (www.drscw.org).
- Public information available on the websites includes:
 - Chloride Fact Sheets aimed at mayors and managers, public works staff, commercial operators, and homeowners.
 - Model Salt Storage and Handling Ordinances and Policies.
 - Model Facilities Plan for Snow and Ice Control.
 - A fact sheet summarizing alternative deicing products.
 - Information of effective operating parameters for commonly used anti icing compounds.
 - Parking lots chloride application rate guidance example sheet and aide memoire.

DuPage River Salt Creek Workgroup

- A brochure on coal tar sealants as a source of Polycyclic Aromatic Hydrocarbons (PAHs) aimed at homeowners (produced by the University of New Hampshire Stormwater Center).
- Fact sheets summarizing the presence of Hydrilla in Ginger Creek and steps to keep the invasive weed from spreading.
- Detailed reports on the biological and chemical conditions of area waterways.

Technical Presentations

Workgroup meetings: The Workgroup hosts bimonthly meetings where technical presentations are made on a variety of water quality topics and surface water management subjects. The audience consists of mainly stormwater and wastewater professionals but the public is welcome to attend. Presentations made during the period March 1, 2024 to March 31, 2025 are listed below. Selected presentations are made available on the DRSCW website and upon request. Technical presentations have also been approved by the IEPA as CEUs for the Wastewater Operator and Drinking Water Operator Certifications.

April 24, 2024 – PFAS Update. Presenter: Deanna Doohaluk, The Conservation Foundation.

April 24, 2024 -- Klein Creek Streambank Stabilization Project. Presenter: Greg Ulreich, Civil/Stormwater Engineer, Dept. of Engineering Services, Village of Carol Stream & Erin Pande, Ecological Services Lead, Engineering Resource Associates, Inc. (ERA)

June 26, 2024 – PFAS Update. Presenter: Nichole Schaeffer, PE, BCEE, Environmental Department Manager, Baxter & Woodman.

August 28, 2024 – The Spread of Round Goby in the Des Plaines and its Tributaries. Research and presentation created by Matt Sarver, Fish Ecologist, Midwest Biodiversity Institute (MBI), presented by Chris Yoder, Research Director, MBI.

August 28, 2024 – Mussel Matters: Saving Critical Species (Documentary Film). Creators & Producers: Lea Rodberry, The Conservation Foundation, and Jonathan Mullen, Forest Preserve District of DuPage County.

October 30, 2025 – What's Up with Winter? Presenter: Wilf Nixon, President, Professional Snowfighters Association.

December 4, 2024 – Lower DuPage River Stream Restoration Project. Presenter: Jennifer Hammer, Vice President of Land and Watershed Programs, The Conservation Foundation.

December 4, 2024 – Street Sweeping for Winter Chloride Reduction. Presenter: Alex Handel, Watershed Scientist, The Conservation Foundation and Stephen McCracken, Director DRSCW, The Conservation Foundation.

Other Water Quality Presentations or Workshops by the DRSCW

January 15, 2024 – The Road to Salt Reduction, The Adirondack Explorer, News Article. Author: Stephen McCracken and Hanna Miller, The Conservation Foundation.

January 24, 2024 – Update on the Master Plan for Salt Creek at Fullersburg Woods, River Prairie Group of the Sierra Club. Presenter: Deanna Doohaluk, The Conservation Foundation.

February 12, 2024 – Watershed Management to meet water quality goals, Water and Waste Management (WWM) Conference, Chanhga, Ahmedabad, Gujarat, India. Presenter: Stephen McCracken, The Conservation Foundation.

February 26, 2024 – Dam Removals in NE Illinois, RiverLife, Gail Borden Public Library, Elgin, Illinois. Presenter: Deanna Doohaluk, The Conservation Foundation

March 20, 2024 – Chlorides in our Waterways: Road Salt and Street Sweeping Initial Results, Chicago Area Waterways Chloride Workgroup (CAWCW) Membership Meeting. Presenter: Alex Handel and Stephen McCracken, The Conservation Foundation.

March 21, 2024 – Mussel Matters: Saving Critical Species in DuPage County, North Central College, Panel discussion on river resource quality. Presenter: Stephen McCracken, The Conservation Foundation.

May 14, 2024 – The Fullersburg Woods Dam Removal, Central States Annual Meeting, the Schaumburg Convention Center. Presenter: Deanna Doohaluk, The Conservation Foundation.

June 5, 2024 – Fullersburg Woods Dam Removal, presentation/site visit for the project requested by League of Woman Voters and Salt Creek Watershed Network (SCWN). Presenter: Deanna Doohaluk and Stephen McCracken, The Conservation Foundation.

July 30, 2024 – Chloride TMDLs and TLWQS in Illinois, National Academies Committee on Managing Pollutant Loads in Highway Stormwater Runoff. Presenter: Hanna Miller, The Conservation Foundation.

September 26, 2024 – MS4s and Chloride TMDLs (Request from IEPA and Association of Clean Water Administrators (ACWA). Presenters: Stephen McCracken, The Conservation Foundation and Mary Beth Falsey, DuPage County Stormwater Management.

September 30, 2024 – Dam Removal and Restoration – local examples and successes, Meet The Conservation Foundation, Inland Real Estate Group of Companies, Inc. Presenters: Deanna Doohaluk and Stephen McCracken, The Conservation Foundation.

October 18, 2024 – Tour of Fullersburg Woods Dam Removal and Stream Restoration Project, Salt Creek Watershed Network. Presenter: Stephen McCracken, The Conservation Foundation

October 23, 2024 – DRSCW 2024 update, DuPage County Mayors and Managers. Presenter: Stephen McCracken, The Conservation Foundation

October 25, 2024 – Tour of Fullersburg Woods Dam Removal and Stream Restoration Project, TCF's Prairie Oak Society. Presenters: Deanna Doohaluk and Stephen McCracken, The Conservation Foundation

November 22, 2024 – Tour of Fullersburg Woods Dam Removal and Stream Restoration Project, MWRD Research and Development. Presenter: Stephen McCracken, The Conservation Foundation

January 23, 2025– Balancing Environmental and Historic Preservation Goals at Fullersburg Forest Preserve, Illinois Association of Parks Departments/Illinois Parks and Recreation Association Soaring to New Heights Conference. Presenters: Deanna Doohaluk, The Conservation Foundation and Tim Pollowy, Hey and Associates, Inc.

March 11, 2025 – Site Tour at Fullersburg Woods, Illinois Association of Floodplain and Stormwater Management Conference. Presenters: Deanna Doohaluk and Stephen McCracken, The Conservation Foundation, Tim Pollowy, Hey and Associates, and Erik Neidy, FPDDC

2. Public Involvement and Participation – No Activities

3. Illicit Discharge Detection and Elimination – No Activities

4. Construction Site Storm Water Runoff Control - No Activities

5. Post-Construction Storm Water Management in New Development and Redevelopment - No Activities

6. Pollution Prevention/Good Housekeeping for Municipal Operations – No Activities

Chloride Questionnaires

The DRSCW has attempted to track adoption of sensible salting BMPs in the program area since 2007. This is done as ambient chloride concentration monitoring; and while the ultimate indicator of success, it has proven an imperfect metric for tracking efficiency trends in winter salt use. Tracking target BMP adoption in the program area allows the DRSCW to evaluate the success of the chloride management workshops. Historically the public roads and parking lots/sidewalks workshops have covered the following practices:

- Winter weather tracking and planning
- Behavior of commonly used deicing compounds
- Product and chemical alternatives
- Equipment calibration training
- Application rates
- Equipment and salt application advancements
- Salt usage, storage and deicing best management practices
- Example salt use policies and management plans

The questionnaires also help identify topics for future workshops and form suppositions about salt use per unit of service expended inside the program area relative to 2006 levels.

Questionnaires were distributed in 2007, 2010, 2012, 2014, 2016, and 2018. They were sent to approximately 80 municipal highway operations and public works agencies. A new questionnaire was due to be distributed in 2022 but was not completed due to a need to rework elements of the questionnaire. It is now due to be issued in May/June 2025.

Chloride Reduction Workshops

During the reporting period March 1, 2024 to March 31, 2025, nine (9) chloride reduction workshops were held. The workshops were held in person as well as in a webinar format allowing the groups to collaborate and host the workshops jointly. The workgroup staff for the DRSCW, LDRWC, Lower Des Plains Watershed Group (LDWG) and Chicago Area Waterways Chloride Workgroup (CAWCW) collaborated with staff from Lake County DOT and Health Dept. to coordinate the workshops. Registration was made available to agencies over a wide area of Illinois resulting in staff attending from Champaign, Cook, DuPage, Fulton, Kane, Kendall, Lake, McHenry and Will Counties. A list of attendees of the Public Roads Deicing Workshop (by County) is included in Attachment 1 and attendees of the Parking Lots & Sidewalks Deicing Workshop (by County) is included in Attachment 2.

The 2024 in-person Public Roads Winter Best Practices Workshops were held on Sept. 17, Sept. 24, and Oct. 3, 2024. Public Roads webinars were held on Oct. 8, Oct. 15, and Nov. 19, 2024. Staff from The Conservation Foundation were engaged to present the material. A registration

DuPage River Salt Creek Workgroup

fee was required per person for the in-person workshops and per agency in order to view each webinar. The webinar links were shareable within an agency. A survey was provided at the end of each webinar to those who had signed in asking for the number of attendees from each agency and for an evaluation of the workshop. Evaluation surveys were also provided at the in-person workshops. The survey results indicated that a minimum of 870 persons attended the five 2024 Public Roads workshops. Certificates of attendance were provided to those who requested them. A link to the *Minnesota Snow and Ice Control: Field Book for Snowplow Operators* was provided to each registrant.

The Parking Lots and Sidewalks Winter Best Practices Workshop webinars were held on Sept. 26 and Nov. 13, 2024 and one in-person workshop was held on Oct. 1, 2024. The Workshops were presented by staff from The Conservation Foundation through the Salt Smart Collaborative. The survey results indicated that there was a minimum of 425 persons who attended the Workshops. Certificates of attendance were provided to those who requested them. The surveys provided an opportunity to provide an evaluation on the webinars. A link was sent to each registrant for the *Illinois Winter Maintenance Manual for Parking Lots and Sidewalks* developed by the Salt Smart Collaborative (developed in part by a Section 319 Grant issued by IEPA).

Ambient Impact Monitoring

DRSCW's Chloride Education and Reduction Program has performed an in-depth analysis to detect trends in chloride loading within the water quality data collected since the beginning of program efforts.

The goal of the analysis is to gauge the impact, if any, of the chloride education program on chloride loadings and concentrations generated from DRSCW water quality data collected from 2009 to present. Such an analysis is challenging due to the influences of other variables that dictate the magnitude of chloride impact on water quality data, principally winter weather (see Figure 1 to Figure 6). The analysis is needed to account for this inherent variability to as great a degree as possible. To help accomplish this the DRSCW purchased 10 years of weather data (snow and ice precipitation data for numerous locations) from Weather Command / Murray and Trettel, Inc. The analysis steps for each site where winter chloride concentration data was available was:

- Calculation of estimated chloride concentrations from winter conductivity data
- Calculation of a warm weather regression value from summer concentration data and summer conductivity measures
- Calculation of estimated chloride summer concentrations

DuPage River Salt Creek Workgroup

- Creation of loading data (in pounds per day) from the estimated concentration data using USGS flow data
- Identification of ice events from the weather command data and “replacement” of such events with loadings observed under snow events with the same accumulation
- Graphing of loading and concentration data for each site

This analysis has been completed and phase one results have been produced. The report is being finalized and will be complete by Summer 2025.

Continuous Chloride Monitoring

When chlorides are present in elevated concentrations in rivers, they harm aquatic invertebrates, fish, and aquatic and terrestrial plants. High chloride concentrations in stormwater also corrode structures like bridges, increasing maintenance costs; and chlorides are very difficult to remove from water through treatment. In the DRSCW and LDRWC watersheds, the source of chloride violations in the rivers is from winter deicing applications. In an effort to understand and track chloride levels in the watershed, year-round conductivity monitoring is carried out.

Ambient conductivity monitoring is carried out at six (6) locations. All conductivity sites were originally installed to collect continuous DO and are situated for that effort rather than for chlorides. DRSCW chloride sites are positioned in the upper and lower sections of each watershed.

The upstream Salt Creek chloride site (Busse Woods) is at the upstream-most point of the Lower Salt Creek watershed (this site isn’t placed further upstream as it was selected to measure DO upstream of the watersheds POTWs). MWRD did not conduct ambient winter conductivity monitoring at the Salt Creek at Busse Woods site in 2021. The site was taken over by DRSCW for conductivity monitoring during the winter of 2022.

For the sites located within the DRSCW watersheds, conductivity concentrations are used to calculate chloride concentrations based on a linear relationship established by the DRSCW. Calculated Annual chloride concentrations for the winter months from 2008-2024 for six (6) sites are depicted in Figure 1 to Figure 6. The Daily Max represents the highest chloride daily value calculated from that year’s winter season. The Winter Average is the average of all measurements from the winter season. The Four-Day Average is the maximum value of the year’s four-day averages. Also shown are seasonal totals for winter snow and ice data. This

data is generated from data supplied by a contract with Weather Command/ Murray and Trettel, Inc. The data is specific to the areas proximate to the relative conductivity monitoring site.

Figure 1. Calculated Chloride Concentrations - Winter Months (2009-2024) for Salt Creek at Busse Woods Main Dam. Data was not collected in 2021.

C. Qualifying State, Country or Local Program

Not applicable to the work of the DRSCW.

D. Sharing Responsibility

This report outlines the activities conducted by the DRSCW on behalf of its' members related to the implementation of the ILR40 permit. It is the responsibility of the individual ILR40 permit holders to utilize this information to fulfill the reporting requirements outlined in Part V.C. of the permit.

E. Reviewing and Updating Stormwater Management Programs

Not applicable to the work of the DRSCW.

PART V. MONITORING, RECORDKEEPING, AND REPORTING

A. Monitoring

The ILR40 permit states that permit holders “must develop and implement a monitoring and assessment program to evaluate the effectiveness of the BMPs being implemented to reduce pollutant loadings and water quality impacts”. The DRSCW monitoring program meets the following monitoring objectives and requirements outlined in the permit:

- Measuring pollutants over time (Part V. A. 2. b. ii)
- Sediment monitoring (Part V. A. 2. b. iii)
- Assessing physical and habitat characteristics such as stream bank erosion caused by storm water discharges ((Part V. A. 2. b. vi)
- Collaborative watershed-scape monitoring (Part V. A. 2. b. x)
- Ambient monitoring of total suspended solids, total nitrogen, total phosphorus, fecal coliform, chlorides, and oil and grease (Part V. A. 2. c.)

The DRSCW water quality monitoring program is made up of four components: 1) Bioassessment; 2) Continuous DO monitoring; 3) Expanded DO monitoring, and 3) Continuous Chloride Monitoring. Components 1-3 are discussed below and component 4 was discussed in the previous section of this report.

BIOASSESSMENT

Overview and Sampling Plan

A biological and water quality survey, or “biosurvey”, is an interdisciplinary monitoring effort coordinated on a waterbody specific or watershed scale. This may involve a relatively simple setting focusing on one or two small streams, one or two principal stressors, and a handful of sampling sites or a much more complex effort including entire drainage basins, multiple and overlapping stressors, and tens of sites. The DRSCW bioassessment is the latter. The DRSCW bioassessment program began in 2007 with sampling in the West Branch DuPage River, East Branch DuPage River and Salt Creek watersheds. From 2009-2016, each watershed was sampled on a 3-year rotation beginning with the West Branch DuPage River watershed in 2006. Beginning in 2017, the watersheds were sampled in a four-year rotation to allow time for the report writing and program assessment. As of 2023, the DRSCW watersheds will be sampled on a six-year rotation. The bioassessment program functions under a quality assurance plan agreed on with the Illinois Environmental Protection Agency (<http://drscw.org/wp/bioassessment/>). Table 1 details the bioassessment sampling dates for each DRSCW watershed.

Table 1. Bioassessment sampling dates for the DRSCW watershed

Watershed	Sampling Completed (year)	Sampling Scheduled (year)
East Branch DuPage River	2007, 2011, 2014, 2019, 2023	2029
West Branch DuPage River	2007, 2009, 2012, 2015, 2020	2027
Salt Creek	2007, 2010, 2013, 2016, 2021	2025

The DRSCW bioassessment program utilizes standardized biological, chemical, and physical monitoring and assessment techniques employed to meet three major objectives:

- 1) determine the extent to which biological assemblages are impaired (using IEPA guidelines);
- 2) determine the categorical stressors and sources that are associated with those impairments; and,
- 3) add to the broader databases for the DuPage River and Salt Creek watersheds to track and understand changes through time in response to abatement actions or other influences.

The data collected under the bioassessment is processed, evaluated, and synthesized as a biological and water quality assessment of aquatic life use status. These assessments are directly comparable to previously conducted bioassessments such that trends in status can be examined and causes and sources of impairment can be confirmed, amended, or removed. A final report containing a summary of major findings and recommendations for future monitoring, follow-up investigations, and any immediate actions that are needed to resolve readily diagnosed impairments is prepared following each bioassessment. The bioassessment reports are posted on the DRSCW at <http://drscw.org/wp/bioassessment/>. It is not the role of the bioassessments to identify specific remedial actions on a site specific or watershed basis. However, the baseline data provided by the bioassessments contributes to the Integrated Priority System that was developed to help determine and prioritize remedial projects (<http://drscw.org/wp/project-identification-and-prioritization-system/>).

Sampling sites for the bioassessment were determined systematically using a geometric design supplemented by the bracketing of features likely to exude an influence over stream resource quality, such as CSOs, dams and wastewater outfalls. The geometric site selection process starts at the downstream terminus or “pour point” of the watershed (Level 1 site), then continues by deriving each subsequent “panel” at descending intervals of one-half the drainage area (D.A.) of the preceding level. Thus, the drainage area of each successive level decreases geometrically. This results in seven drainage area levels in each of the three watersheds, starting at the largest

DuPage River Salt Creek Workgroup

(150 sq. mi) and continuing through successive panels of 75, 38, 19, 9, 5 and 2 sq. mi. Targeted sites are then added to fill gaps left by the geometric design and assure complete spatial coverage in order to capture all significant pollution gradients including reaches that are impacted by wastewater treatment plants (WWTPs), major stormwater sources, combined sewer overflows (CSOs) and dams. The number of sampling sites by method/protocol and watershed are listed in Table 2.

Table 2. Number of sampling sites in the DRSCW project area.

Method/Protocol	West Branch DuPage River (2020)	East Branch DuPage River (2023)	Salt Creek (2021)	Reference Sites (2006- 2021)	Total Sites
Biological sampling					
Fish	42	46*	65*	13	166
Macroinvertebrates	42	45*	65*	13	165
QHEI	42	46*	65*	13	166
Water Column Chemical/Physical Sampling					
Nutrients**	42	39	57	6	144
Water Quality Metals	30	22	34	6	92
Water Quality Organics	18	11	17	6	52
Sediment Sampling	23	15	27	6	71

*Includes sites sampled as part of pre-project monitoring for the physical projects.

**Also included indicators of organic enrichment and ionic strength, total suspended solids (TSS), DO, pH and temperature. Also, in 2019, 2020 and 2023, chlorophyll A was included as a nutrient parameter.

Representativeness – Reference Sites

Data is collected from selected regional reference sites in northeastern Illinois preferably to include existing Illinois EPA and Illinois DNR reference sites, potentially being supplemented with other sites that meet the Illinois EPA criteria for reference conditions. One purpose of this data will be to index the biological methods used in this study that are different from Illinois EPA and/or DNR to the reference condition and biological index calibration as defined by Illinois EPA. In addition, the current Illinois EPA reference network does not yet include smaller headwater streams, hence reference data is needed to accomplish an assessment of that data. Presently thirteen (13) reference sites have been established.

The bioassessment sampling includes four (4) sampling methods/protocols: biological sampling, Qualitative Habitat Evaluation Index (QHEI), water column chemical/physical parameter sampling and sediment chemistry. The biological sampling includes two assemblages: fish and macroinvertebrates.

No bioassessment was conducted in 2024. However, at the time of the 2023 DRSCW MS4 Activities Report, the macroinvertebrate results for the 2023 East Branch DuPage River bioassessment were not available and are included in this report. Other results (Fish, Habitat and Water Chemistry) for the 2023 East Branch DuPage River Bioassessment are included in the 2023 DRSCW MS4 Activities Report dated May 8, 2024. A list of the sampling sites included in the 2023 East Branch DuPage River bioassessment is provided in [Table 3](#) and a map of the 2023 East Branch DuPage River bioassessment sites can be found in Map 2. Detailed analysis of all results for the East Branch DuPage River, the West Branch DuPage River and Salt Creek and their tributaries and can be found at <http://drscw.org/wp/bioassessment/>.

The fish and macroinvertebrate results are presented as Illinois EPA Index of Biotic Integrity (IBI) scores. IBI is an evaluation of a waterbodies biological community in a manner that allows the identification, classification and ranking of water pollution and other stressors. IBIs allow the statistical association of various anthropogenic influences on a water body with the observed biological activity in said water body and in turn the evaluation of management interventions in a process of adaptive management. Chemical testing of water samples produces only a snapshot of chemical concentrations while an IBI allows an evaluation of the net impact of chemical, physical and flow variables on a biological community structure. Dr. James Karr formulated the IBI concept in 1981.

DuPage River Salt Creek Workgroup

Table 3. 2023 East Branch DuPage River Bioassessment Sampling Sites and Frequency of Sampling

Site Number	River	Latitude	Longitude	Frequency of Sampling during the 2023 Bioassessment

MACROINVERTEBRATES

Methodology

The macroinvertebrate assemblage is sampled using the Illinois EPA (IEPA) multi-habitat method (IEPA 2005). Laboratory procedures followed the IEPA (2005) methodology for processing multi-habitat samples by producing a 300-organism subsample with a scan and pre-pick of large and/or rare taxa from a gridded tray. Taxonomic resolution is performed to the lowest practicable resolution for the common macroinvertebrate assemblage groups such as mayflies, stoneflies, caddisflies, midges, and crustaceans, which goes beyond the genus level requirement of IEPA (2005). However, calculation of the macroinvertebrate IBI followed IEPA methods in using genera as the lowest level of taxonomy for mIBI calculation and scoring.

Results

East Branch DuPage River

Macroinvertebrate assemblage conditions throughout the East Branch DuPage River watershed are in primarily in the fair range in watershed with several sites in the good range in the lower portion of the watershed (Figure 7).

Figure 7. Macroinvertebrate IBI scores in the East Branch DuPage River in 2007, 2011, 2014, 2019, and 2023 relation to municipal POTW dischargers and tributaries

DISSOLVED OXYGEN (DO) MONITORING

Background and Methodology

The Illinois Environmental Protection Agency (IEPA) report, Illinois 2004 Section 303(d) List, listed dissolved oxygen (DO) as a potential impairment in Salt Creek, and the East and West Branches of the DuPage River. The report suggested that the DO levels in selected reaches of these waterways might periodically fall to levels below those required by healthy aquatic communities.

All rivers and creeks in DuPage County are classified as General Use Waters. The present water quality standards for dissolved oxygen in General Use Waters is:

1. During the period of March through July
 - a. 5.0 mg/L at any time; and
 - b. 6.0 mg/L as a daily mean averaged over 7 days.
2. During the period of August through February,
 - a. 3.5 mg/L at any time;
 - b. 4.0 mg/L as a daily minimum averaged over 7 days; and
 - c. 5.5 mg/L as a daily mean averaged over 30 days.

Following listing on the 303 (d) list two (2) DO TMDLs were prepared by the IEPA for Salt Creek and the East Branch of the DuPage River in 2004 and two (2) DO TMDLs were prepared for the West Branch DuPage River and Spring Brook #1 in 2019. In response to the TMDLs, the DRSCW committed to develop and manage a continuous long-term DO monitoring plan for the project area in order to assess the nature and extent of the DO impairment and to allow the design of remedial projects. The continuous DO data is also used to assess the impact of DO improvement projects such as the Churchill Woods and Oak Meadow dam removals.

In 2023, the DRSCW in collaboration with DuPage County Stormwater Management gathered continuous DO data via water quality sondes at four (4) sites on Salt Creek (SCBW, SCOM, SCBR SCFW), five (5) sites on the East Branch DuPage River (EBAR, EBCB, EBHL, EBHR, EBWL), and five (5) sites on the West Branch DuPage River (WBAD, WBBR, WBWD, WBMG, WBNPV) that will be utilized in the calibration and verification of the updated QUAL2Kw models. The Metropolitan Water Reclamation District of Greater Chicago (MWRDGC) also typically monitors one (1) additional location on Salt Creek. All sondes are deployed from May through October and collected DO, temperature, conductivity, and pH on an hourly basis. The continuous DO monitoring program functions under a quality assurance plan agreed on with the IEPA (<http://drscw.org/wp/dissolved-oxygen/>). Details on the site location are included in Table 4 and site locations for 2024 are included on Map 3.

DuPage River Salt Creek Workgroup

Results

Results of the continuous DO monitoring conducted in the summer of 2024 is included in Figure 8 to Figure 15 for the following sites: WBAD, WBBR, WBWD, WBMG, WBAR, EBCB, SCOM, and SCBR. Data for WBNPV, EBHL, EBHR, EBWL, SCBW, and SCWR was not available at the time of this report. Once available an addendum will be issued and the data will also be included in the 2025 DRSCW MS4 Activities Report. No data was collected at SCFW in 2024 due to construction activities associated with the Master Plan for Salt Creek at Fullersburg Woods which included the removal of the Graue Mill Dam and the restoration of 1.25 miles of Salt Creek.

Table 4. 2024 Continuous DO monitoring locations in the DRSCW watersheds

Site ID	Stream Name	River Mile	Latitude	Longitude	Location
WBAD	W. Br. DuPage River	29.9	41.9750	-88.1386	Arlington Drive
WBBR	W. Br. DuPage River	11.7	41.825268	-88.179456	Butterfield Road

EXPANDED DO MONITORING

In 2019, the DRSCW began their expanded DO Monitoring Program as a means to collect additional data to support the calibration/validation of the QUAL2Kw models and to support the development of the Nutrient Implementation Plan (NIP). This program is coordinated with the Bioassessment Program (see Table 5 for schedule). No Expanded DO sampling was conducted in 2024.

Table 5. Schedule for Expanded DO Monitoring

Basin	Year of Expanded DO Monitoring Completed	Year of Expanded DO Monitoring Scheduled
East Branch DuPage River	2019, 2023	2029
West Branch DuPage River	2020	2027
Salt Creek	2021	2025
